PROFESSIONAL PROFILE

Systems and Computing Engineering student with practical experience in data analytics, process automation and internal technology solutions. During my internship at Keralty (Colsanitas), I worked with BigQuery, Looker Studio, Google Cloud Storage, Apps Script, AppSheet, SQL, HTML and JavaScript. I complement this experience with computer vision projects and hands-on cybersecurity and pentesting labs.

EXPERIENCE

Data Analytics Intern | Keralty (Colsanitas)

Jul 2025 - Jan 2026

- Built and automated an interactive dashboard for active-break adoption using CSV data, BigQuery and Looker Studio with daily updates.
- Managed datasets in Google Cloud Storage and external tables in BigQuery for direct querying from cloud buckets.
- Improved performance and labor-cost dashboards using SQL queries, business rules and custom metrics in BigQuery.
- Developed an internal corporate-uniform management application with Apps Script, HTML and JavaScript, including status tracking.
- Executed ETL processes to clean, update and integrate multiple corporate data sources into BigQuery.
- Developed internal AppSheet and JavaScript solutions to support logistics and automatic record validation.

SELECTED PROJECTS

Tienda IA - Smart Checkout with Computer Vision

Python | YOLO11 | OpenCV | github.com/Naiker-96/TiendalA

- Real-time system that detects products and Colombian banknotes, builds a shopping list and calculates total, balance and change.

DockerLabs Writeups - Cybersecurity Labs

Linux | Kali Linux | Pentesting | github.com/Naiker-96/dockerlabs-writeups

- Step-by-step documentation of controlled labs covering reconnaissance, enumeration, exploitation and privilege escalation.

EDUCATION & RECOGNITION

Systems and Computing Engineering - Universidad Catolica de Colombia

Jan 2022 - Present

- 1st place - Hackathon XII, Engineering Week (2025).
- 2nd place - Hackathon XI, Engineering Week (2024).
- MITO Research Group - Interuniversity Programming Competition (GISIC), 2024.

TECHNICAL SKILLS

Data & BI:

BigQuery, Looker Studio, Power BI, SQL, Google Cloud Storage, ETL

Automation:

Google Apps Script, AppSheet, JavaScript

Development:

Python, JavaScript, Java, C++, HTML, CSS, Git

AI / Vision:

OpenCV, YOLO11

Cybersecurity:

Linux, Kali Linux, pentesting labs, vulnerability analysis

CERTIFICATIONS

- Cybersecurity and Ethical Hacking: Vulnerability Detection and Digital Defense - BIG School, Apr 2026.
- Professional Foundations in Cybersecurity - Microsoft and LinkedIn, May 2024.
